Low Cost KWALITY POLYWA - WHITE POWER LED emit 110lumens.

Kwality Photonics has indigenously developed KWALITY POLYWA - One Watt, Three Watt, Higher Watt Color
White LED
which achieves a benchmark in brightness by providing an output of 1
20-140 Lumens
from a single emitter package.

KWALITY PHOTONICS PVT LTD, India's No1 manufacturer of the LEDs. Now offer globally superior highest Output and best Thermal and Reliability proven
Power LEDs of 350 to 700mA ratings.

The NEW PolyWa LEDs produce 100+ lumens at 350mA and 160+ Lumens at 700mA and produce least heat due to lower Dissipation. Reliability-At 85C/85RH 1000hrs they show least light depreciation. The all-Silicone Encapsulation ensures excellent handling in reflow solder process and outdoor performance.

These Pollywa LEDs delivers almost thirty times the flux delivered by an ordinary LED. This combined with sharply falling prices encourages immediate shifting over to Solid state Energy efficient light fixtures and luminaries lasting for 5 to 15 years.

The Lighting industry can benefit from small size. Bright light, low power consumption, l ong life of upto 50000 Hours
. The
PolyWa LEDs
make possible cosmetically appealing. Improved beam quality & Cooler to the touch operation in light fixtures.

Kwality has a very competitive cost structure and assures lowest price guarantee and best performance for large projects.
